

Features

- **Automatic Sensor Flushing, Intelligent Water Saving**
Equipped with infrared sensor technology for hands-free operation—the unit flushes automatically after use, enhancing hygiene and convenience.

Smart flushing system adjusts water volume based on usage, reducing water consumption and operating costs.

- **Floor-Mounted Design, Stable and Stylish**
The floor-mounted structure ensures greater stability and durability, making it ideal for high-traffic public areas.

Clean and modern appearance that blends well with various restroom design styles.

- **Touch-Free Operation, Enhanced Hygiene**
Completely touchless usage minimizes the risk of cross-contamination, meeting the hygiene standards of modern public restrooms.

Perfect for airports, shopping malls, office buildings, schools, and other high-demand environments.

- **Easy to Clean and Maintain**
High-temperature glazed surface provides strong stain resistance and easy maintenance.

Optimized flushing design prevents odors and buildup, and internal components are easy to access for repairs.

- **Energy-Efficient and Durable**
Low power consumption sensor system supports dual power options: battery or direct power, offering flexible installation.

Reliable solenoid valve and sensor components ensure long-lasting performance in various conditions.
